

Potatoes Storage in England.
A general alarm was sent out yesterday by the British Ministry of Agriculture, London, that the potato crop in England was in danger of being ruined by a pest called the Colorado beetle. The pest is a small insect which feeds on the leaves of the potato plant and causes them to wither and die. The Ministry has issued instructions to farmers to watch their crops closely and to take prompt action if they find signs of the pest.

Do you see the pictures distinctly—and without subsequent eye-strain or headache?

Do you get all the pleasure you should from the "movies?" Do you see the people on the screen, but not their eyes or their expressions?

We have fitted glasses for special use at the "movies," with the result that the wearers are now enjoying their "picture" evenings.

If your eyes have given you discomfort—at the "movies" or elsewhere—have one of our Oculists examine them.

He will only advise glasses if their need is positively indicated—take OUR word for that.

If glasses are needed and you elect to obtain them, the cost will be from \$2 upward—depending upon the quality of mounting selected and the kind of lenses prescribed.

HARD COAL NO SMOKE COMFORT

HUGHES TO STUMP UNTIL ALMOST EVE OF ELECTION DAY

May Take in the Texan Border and Do a Little Campaigning With Troops.

LARAMIE, Wyo., Aug. 24.—Ray for two days' rest at Northampton, N. J., immediately after the conclusion of his present trip. Republican Nominee Hughes will be continuously on a speaking tour from now until election time.

According to tentative plans, Mr. Hughes will set a new record in campaigning if he is physically fit to follow out the itinerary prepared for him.

To-day he thought he would be able to go through, because he was feeling so fit. It is the nominee's hope that he will be personally to a majority of the voters of the United States.

By the time he has finished his present trip he estimates that he will have been heard by about 1,000,000 persons. After he has completed other campaign tours he will have covered practically every section of the United States.

As arranged to-day, the nominee will conclude his present tour by a speech at the Syracuse State Fair on Grange Day, Sept. 11. He will then return direct to Bridgehampton, remaining there not more than three days before swinging out again.

On Nov. 4—Saturday night before the election—the nominee will conclude his campaign for the presidency by addressing a mass meeting at Madison Square Garden, New York.

He is exceedingly anxious to make a visit to the Texas border, and possibly campaign a little among the soldiers.

His slogan "America First and America Efficient" seems to have made a hit with the Western Republics. This, the tariff and Mexico were the subjects of his address at Salt Lake City last night when he spoke in the Mormon Tabernacle. He is the third candidate for President of the United States to be accorded this distinction in recent years.

BURGLARS' REUNION SPOILED.

Detective Captures Escaped Convict Waiting for Another.

There was to have been a reunion to-day of two burglars at Twentieth Street and Third Avenue, but Detective Friday spoiled it. Joseph Tropolino, alias Kid McCarthy, twenty-one, was captured while waiting for Walter Hanson, twenty.

Both were serving terms in prison for burglary. Tropolino was at the North Hampton prison camp when he escaped Aug. 2. Hanson, who was in Sing Sing, escaped in June. Hanson sent letters to Tropolino through a mutual friend. They planned to meet to-day, the police learned, and the detective was waiting for them.

The Evening World's Beauty and Health Column

Conducted by Pauline Furlong

Through This Column Miss Furlong Will Reply to Women Readers' Questions Regarding Exercise, Diet and Other Means of Preserving Good Health and Good Looks.

Example, But to the Free Press.

Weakness of the back and upper shoulder muscles often causes the chest and protruding shoulder blades.

Illustration of a woman's back and shoulders.

Ground muscular weakness of the back affects the entire carriage of the whole body, because it throws out of position the joints of the rest of the spinal column, by forcing a curving forward of the vertebrae of the neck.

To prevent this, exercises for the chest, upper arms and shoulders should be taken daily, especially by those who are compelled to work at a desk all day in a crouching position, and growing children at school. For this the chest raising exercise, from the wall, which has been shown many times, is the most valuable.

In a remarkably short time chest raising will fill in hollows in neck, correct round shoulders and enlarge upper arms and shoulders.

Letters from Readers.

CURLY HAIR.—D. N. writes: "Will you please tell me something to use to make light hair very curly? I want something that will not harm nor split the hair in any way. Please mention something inexpensive, as I cannot afford to pay a big price for things."

Brush the hair with diluted white of egg. Just then the egg out with cold water. Then put the strands up in curlers. This will keep the hair curly many days, even at the beach.

TO REDUCE STOMACH AND HIPS.

D. N. writes: "I read each day with great interest about your wonderful success with readers who have followed your lessons in reducing. I am so anxious to reduce large stomach, hips and thighs and develop perfectly flat bust. Please tell me how."

Eat less of all foods to reduce a large stomach, and practice body bending and twisting and trunk raising to help. Roll to reduce the hips, about twenty-five times each way every day. Leg circling is best to reduce thighs, and chest raising and deep breathing will quickly develop chest and bust. Send for the obesity diet (two cents), and ask for it, if you are much over-weight.

TO DARKEN HAIR.

Mrs. Laura T. writes: "Will you please repeat the directions for henna, to redden the hair, and walnut stain to darken?"

Send us two cents and ask for the henna directions. They are too lengthy to print so often. For wal-

nut stain get one-half pound of dried chestnut shells and pour a pint of water over them. When cold strain and brush on clean hair. Both henna and walnut stain are vegetable coloring and harmless.

ALUM SOLUTION.—MRS. F. G. writes: "Will you please give again the formula for alum solution for hardening the baby's hair on double ends?"

Put the jar or bottle in a moderate oven for ten minutes in pure boiling water. Then remove the jar and pour a little of it into the jar as they are taken from the oven, then wash, place on hands and set aside out of a cold draught.

HEALTHY APPEARANCE.—HAR. writes: "Will you please give again a good indication of health in one's appearance?"

Bright eyes, clear, pink skin, sweet breath, moderate body, straight shoulders when sitting and walking, poised and calm, cheerful disposition, deep, easy breathing are some.

FORMULA FOR GRAPE JUICE.—MRS. B. K. writes: "I am anxious to make grape juice. Can you give me a formula for same?"

The United States Department of Agriculture, Farmers' Bulletin gives the following formula for grape juice: Wash grapes and pick from the stems. Put fruit in preserving kettle and crush lightly. Heat gradually and boil gently for half an hour. Crush fruit with a wooden spoon. Put a piece of muslin over a large bowl and spread a square of cheesecloth over the sieve. Turn fruit and juice into the cheesecloth, drain well and then draw the edges of the cheesecloth together and twist hard to press out all of the juice possible. Put the strained juice into a clean preserving bottle and on the fire. Then add sugar (one cup of sugar to a quart of juice) and stir until dissolved. Boil five minutes, skimming carefully. Fill

hot sterilized jars or bottles. Put the jar or bottle in a moderate oven for ten minutes in pure boiling water. Then remove the jar and pour a little of it into the jar as they are taken from the oven, then wash, place on hands and set aside out of a cold draught.
